Angular with Native Federation

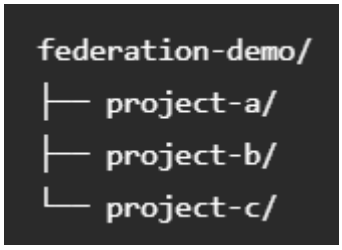

Installation

```
npx @angular/cli@22.2.2 new project-a --standalone --routing --style=css --skip-tests --ssr=false --package-manager=npm

npx @angular/cli@22.2.2 new project-b --standalone --routing=false --style=css --skip-tests --ssr=false --package-manager=npm

npx @angular/cli@22.2.2 new project-c --standalone --routing=false --style=css --skip-tests --ssr=false --package-manager=npm
```

Folder Structure

Setup

```
cd project-a

npx ng add @angular-architects/native-federation@22.2.2 --project project-a --port 4200 --type host
```

```
cd ..\project-b

npx ng add @angular-architects/native-federation@22.2.2 --project project-b --port 4201 --type remote
```

Define Application Exposures

```
name: 'project-a',

exposes: {
  './AppStateService': './src/app/app-state.service.ts',
},
```

Architecture
